

Our hotel is Nature Friendly.

First of all, thank you for joining our Eco-Friendly journey.

The choices we make while maintaining our daily life habits, especially in terms of consumption, are instrumental in transforming brands into **NATURE-FRIENDLY** brands by changing their visions and missions in line with the demand from consumers.

With the measures we take in the light of sustainable tourism principles, the use of natural resources has been reduced, and practices are aimed to minimize and, if possible, eliminate the damages to soil, water and air.

As **SIDE SUN HOTELS**, we are aware of and committed to our responsibilities in sustainable tourism and development.

In this context, as **SIDE SUN HOTELS** group, we are trying to fulfill our responsibilities towards the environment and nature by developing Nature Friendly projects.

We share all our activities with the public by publishing all our activities under the title of sustainability on our website every year regarding the general status of all our work and our goals achieved.

We would like to thank you for supporting us by joining us in this regard and making us stronger.
