

# Local Awareness Policy

At Greenbay Resort & Spa, we consider it our duty to protect the natural fabric, cultural heritage, and local community of Milas Meşelik, where we are located, and to introduce these values to our guests. This policy aims to ensure that our tourism activities are carried out in harmony with the local people, in a sustainable and respectful manner.

For this purpose:

- We support the protection of local resources and facilities and the accessibility to them.
- We promote the preservation of local culture and traditions; we do not permit discriminatory practices related to opinion, ethnicity, belief, or vulnerable groups. We recognize that both tourists and workers from different cultures contribute to regional development and should be welcomed with hospitality.
- We conduct consultations to ensure that local characteristics, sensitivities, and the needs of local people are considered in decision-making. Eco-friendly practices are adopted to avoid harming the region's rich flora and fauna.
- We support the preservation of historical and archaeological artifacts.
- We work together with the local population to protect historical and cultural assets and prevent the degradation of the natural environment.
- We contribute to the regional economy through local employment and procurement.
- We support all stakeholders in promoting the region's cuisine, activities, culture, and traditions (such as religious-cultural sites, natural riches, biodiversity, etc.).
- We organize awareness training for our staff and guests to encourage a service approach that is sensitive to the region.
- We collaborate with local authorities and non-governmental organizations on education, culture, and environmental projects. Through our interaction with local communities, we engage in joint efforts around shared goals to preserve these values.
