About the Report

At Marmaris Bay Resort Hotel, we are fully aware of the responsibilities that come with sustainable tourism. We are committed to providing our guests, employees, suppliers, and all other stakeholders with transparent, accurate, and effective information regarding the environmental, social, cultural, and economic impacts of our operations.

Prepared in line with this commitment, our 2026 Sustainability Report presents our initiatives aimed at reducing environmental impacts, using natural resources efficiently, preserving cultural heritage, strengthening our social responsibility practices, and supporting economic sustainability.

Our report evaluates our sustainability performance while demonstrating the activities we have implemented and our commitment to continuous improvement in pursuit of our goal of leaving a more livable world for future generations.

Our 2026 Sustainability Report includes:

- An evaluation of our environmental, social, cultural, and economic performance;**
- The sustainability objectives established to continuously improve our performance;**
- The strategies, activities, and monitoring processes implemented to achieve these objectives;**
- Potential sustainability-related risks and the measures taken to mitigate them;**
- Our practices for conserving natural resources, supporting biodiversity, and preserving cultural heritage;**
- The initiatives carried out to minimize the environmental impacts arising from our operations.**

In line with the principles of sustainable tourism, we remain firmly committed to reducing our environmental impacts, creating social value through the active participation of all our stakeholders, and contributing to a more sustainable future for generations to come.

Hotel Introduction

Marmaris Bay Resort is a distinctive adults-only (+16) resort located in a private bay surrounded by pine forests amidst the unique natural beauty of Marmaris. Although situated close to the town center, the hotel offers a peaceful atmosphere where guests can enjoy the perfect harmony of nature, the sea, and comfort. With its contemporary architecture that blends seamlessly with the surrounding environment and its commitment to exceptional guest satisfaction, the resort provides a unique holiday experience.

The hotel features a wide range of facilities, including buffet and à la carte restaurants offering diverse culinary experiences, bars serving a variety of beverages, social areas designed for relaxation and entertainment, and numerous leisure opportunities throughout the day. Thanks to its beachfront location, private-bay atmosphere, exclusive beach area, and pier, guests can comfortably enjoy the crystal-clear waters of the Aegean Sea.

Marmaris Bay Resort is conveniently located within easy reach of Marmaris town center and approximately 90 km from Dalaman Airport. Surrounded by nature and offering a tranquil environment with its adults-only concept, the resort provides an ideal accommodation experience for guests seeking a peaceful, high-quality, and relaxing holiday.

By combining comfort, hospitality, and environmental responsibility, Marmaris Bay Resort aims to deliver memorable guest experiences while operating in harmony with the natural and cultural values of its destination.

Sustainable Tourism Policy

As Marmaris Bay Resort Hotel, we are aware that sustainable tourism plays a key role in the further development of tourism. We recognize our responsibilities in this regard and act accordingly.

In order to implement the principles of sustainable tourism, we work jointly with our guests, employees, and stakeholders.

In line with our Sustainable Tourism Policy, we commit to:

Complying with national and international legal requirements and standards in all our product and service processes,

Providing a working environment that respects human rights, is based on equal opportunity principles, and rejects discrimination,

Conducting regular training programs to raise awareness of sustainability among all our employees,

Prioritizing local, environmentally friendly, and efficient purchasing practices during procurement processes,

Reducing our negative environmental impacts and protecting natural resources,

Carrying out activities aimed at the protection of biodiversity,

Carrying out activities aimed at preserving and promoting historical and cultural areas to our guests,

Transparently sharing the data obtained in line with sustainable tourism with our guests and stakeholders.

We hereby commit to these principles.

Employee and Human Rights Policy

OCCUPATIONAL HEALTH and SAFETY

We hereby commit to complying with the environmental and occupational health and safety legislation in force in our country, as well as local requirements and Environmental, Occupational Health and Safety rules.

We will ensure that our Occupational Health and Safety management system is adopted and effectively implemented by our employees and subcontractors by planning and providing the necessary training.

In order to reduce environmental impacts, occupational accidents, near-miss incidents, and occupational diseases, we will proactively identify risks and take necessary preventive measures. We will record all incidents and continuously improve our environmental and Occupational Health and Safety performance.

In this regard, we will define objectives and targets, review them annually, and regularly report on progress and improvements.

We hereby declare and undertake this commitment.

NON-DISCRIMINATION IN EMPLOYMENT

We recognize respect for the fundamental rights and freedoms of all our stakeholders as a core responsibility.

At Marmaris Bay Resort Hotel, our employment relationship is based on the principle of equal opportunity and is conducted without discrimination on the basis of race, color, gender, religion, political opinion, trade union membership, nationality, sexual orientation, age, or disability.

Our establishment prioritizes the employment of local people, including in managerial positions.

We also place importance on the employment of persons with disabilities within our organization and maintain designated positions allocated for disabled employees.

WOMEN'S RIGHTS and GENDER EQUALITY

We value gender equality within our organization.

- We ensure the health, safety, and well-being of all employees regardless of gender.
- We support women's participation in the workforce across all departments and provide equal opportunities.
- We apply a "equal pay for equal work" policy without any gender discrimination.
- We ensure fair task distribution based on the principle of equality.
- We provide an environment that enables equal access to career opportunities for all employees.
- We develop training policies and support women's participation and awareness-raising initiatives.
- We promote a work environment and practices that support work-life balance.
- We encourage and support women's representation in hotel management by providing equal opportunities.
- We do not tolerate any form of abuse, harassment, discrimination, oppression, coercion, or defamation against women. We recognize and value the contribution of women to our organization and the world, and we fully support their presence and development within our workplace.

Child Rights Policy

We recognize that all children have fundamental rights and we are committed to respecting, protecting, and supporting these rights in all our activities.

At Marmaris Bay Resort Hotel, we adopt a zero-tolerance approach to any form of child abuse, exploitation, neglect, or discrimination.

- We comply fully with all national and international laws and regulations regarding the protection of children.
- We do not tolerate child labor under any circumstances within our operations or supply chain.
- We are committed to ensuring a safe environment for children and take necessary preventive measures against any form of abuse or exploitation.
- We train our employees to recognize, prevent, and report any suspected cases of child abuse or exploitation.
- We cooperate with relevant authorities in cases where child safety is at risk or a violation is suspected.
- We support initiatives that promote children's well-being, education, and development.
- We ensure that all activities conducted within our facilities are safe and appropriate for children.

We consider the protection of children a fundamental ethical responsibility and an integral part of our corporate values.

Environmental Protection and Waste Management Policy

As Marmaris Bay Resort Hotel, we are fully aware of our responsibilities towards the environment and society together with all our employees. In this regard, we protect the environment, prevent pollution, and prioritize reducing our negative environmental impacts to ensure environmental sustainability.

To achieve this, we commit to the following:

- Ø We monitor and comply with national and international environmental regulations, ensuring continuous improvement and sustainability in compliance practices.
- Ø We share our environmental protection policy with our guests and all stakeholders and contribute to raising environmental awareness.
- Ø We strive to use water, energy, and all natural resources efficiently and responsibly, and we promote this awareness among our employees, guests, and suppliers.
- Ø We follow environmentally friendly technologies that prevent pollution and minimize environmental impact. We ensure waste reduction at the source, proper segregation, and safe disposal of hazardous waste without harming the environment.
- Ø We understand that using hazardous substances and chemicals only when necessary and in appropriate quantities reduces both environmental impact and waste generation.
- Ø We prioritize purchasing materials with recycling and eco-friendly labels to support environmental protection.
- Ø We use single-use materials such as paper, napkins, toilet paper, and packaging only when necessary to minimize waste generation.
- Ø We store waste in designated areas according to their types and ensure they are handed over to licensed/authorized companies within legal storage time limits, keeping proper records.
- Ø We measure our environmental performance and track it against our defined objectives and targets.
- Ø We aim to train our employees and suppliers on environmental issues and increase their awareness and sensitivity.

Sustainable Purchasing Policy

Our primary goal is to ensure sustainability in purchasing in order to minimize the negative effects of our business on the environment and to contribute to the development of our environment.

We take care to ensure that the food and beverage products purchased for our hotel are of top quality, in accordance with their purpose and relevant legislation. Our purchases are sourced as locally as possible.

In supplier selection, companies that comply with legal regulations are preferred. Documents required within the scope of food safety are requested from the supplier.

In order to limit and minimize the effects of our business on the environment during its operation, during the purchase, along with price, quality and suitability, tools–equipment–products that consume less energy,

Tools–equipment–products that consume less water,

Tools–equipment–products that produce less waste,

Materials that are least harmful to the environment are preferred.

When purchasing a product, not only the purchase cost but also the lifetime cost is taken into consideration.

We strive to ensure that our suppliers gain awareness about the supply of sustainable products and services.

Energy Efficiency Policy

As Marmaris Bay Resort Hotel, we are aware of the importance of efficient energy and water use for the sustainability of our planet. Therefore, we implement various measures to reduce energy and water consumption. Energy and water usage are regularly monitored, and we set targets to continuously reduce consumption.

To achieve this, we commit to the following:

- We comply with national and international standards, laws, and regulations in order to fulfill both our environmental responsibilities and legal obligations.
- We utilize renewable energy sources for energy production in our hotel and continue our efforts to increase the use of renewable energy.
- Our hotel operates a biological wastewater treatment plant, and treated water is reused for irrigation of our gardens.
- We recognize that employee behavior is crucial in energy efficiency; therefore, we include energy efficiency topics in our staff training programs.
- We continuously seek opportunities to reduce energy consumption and improve our energy performance.
- We prioritize the purchase of energy-efficient products, equipment, and technologies.
- We assess energy and water-related emergency situations and plan preventive measures accordingly.

Cultural Heritage Protection Policy

As Marmaris Bay Resort Hotel, we attach great importance to the protection of the cultural heritage in our country. We undertake to fulfill our responsibilities in order to transfer the historical and cultural heritage to future generations and present it to our guests.

- 1. Preservation of Historical Buildings and Structures:** Marmaris Bay Resort Hotel, supports the protection of historical buildings and structures in the region where the facility is located.
- 2. Cultural Events and Education:** Marmaris Bay Resort Hotel, hosts various cultural events to promote local culture and history. We provide training to our employees about local history and culture, enabling them to provide information to our guests. In addition, our guests are informed about the history of Marmaris and places to visit.
- 3. Protection of Cultural Artifacts:** We take the necessary precautions to protect the cultural artifacts, objects and works of art inside or around our hotel. We take the necessary steps to exhibit and preserve these works without damaging their originals.
- 4. Environmental Sustainability:** Marmaris Bay Resort Hotel, is committed to acting in harmony with the environment. We adopt various sustainable practices to minimize environmental impacts at our facility.
- 5. Local Community Support:** We collaborate to support local communities and cultural organizations. This is a step which taken to contribute to the local economy and revitalize cultural heritage.

Guest Satisfaction

At Marmaris Bay Resort Hotel, guest satisfaction is one of our highest priorities. To evaluate the quality and effectiveness of our services, measure how well we meet guest expectations, and support our commitment to continuous improvement, we regularly collect feedback through online guest satisfaction surveys.

If a guest experiences any dissatisfaction during their stay, our priority is to resolve the issue before departure and ensure they enjoy a pleasant and memorable holiday. For this reason, we actively encourage guests to share their feedback throughout their stay. All comments, suggestions, and complaints received either during the guest's stay or after departure are carefully reviewed and evaluated by our Guest Relations Department. The findings are used to identify improvement opportunities, implement corrective actions where necessary, and continuously enhance the overall guest experience.

Local Purchasing

At Marmaris Bay Resort Hotel, contributing to the economic development of the local community is one of our key priorities in line with our sustainable tourism approach. Therefore, we give preference to local producers and suppliers whenever possible throughout our procurement processes, with the aim of supporting the regional economy while reducing the environmental impacts of our supply chain.

One of our sustainability objectives is to increase our local procurement rate by 3%.

In our supplier evaluation processes, we consider not only price and quality but also suppliers' sustainability performance as an important selection criterion.

Purchasing from local suppliers helps reduce transportation distances, thereby lowering logistics-related carbon emissions and enabling products to be delivered to our hotel more quickly. In addition, establishing long-term partnerships with local businesses contributes to regional employment, strengthens the local economy, and supports long-term economic sustainability.

Sustainable Living

Current consumption patterns exceed the limits of the natural resources that our planet can sustainably provide. If this trend continues, it is expected to lead to significant environmental and social challenges in the near future. In fact, some of these challenges have already begun to emerge as a result of climate change. In the coming years, many regions of the world are expected to face critical issues such as water scarcity, drought, climate-induced migration, and disruptions to food supply.

For this reason, implementing sustainable practices within the tourism industry—where resource consumption is relatively high—is of great importance. Sustainable tourism requires us to consider the current and future economic, social, and environmental impacts of our activities and to manage our operations responsibly in line with these principles. By embracing this approach, we contribute to the conservation of natural resources, support local communities, and help ensure a more sustainable future for generations to come.

Even the small steps we take to protect the environment are of great importance for our world.

Energy Management

At Marmaris Bay Resort Hotel, we are committed to reducing the consumption of natural resources and improving our energy performance through continuous monitoring and effective management. Our energy consumption is monitored on a regular basis, and any unusual consumption or operational issues are addressed promptly to prevent unnecessary resource use. The energy efficiency practices implemented at our hotel include the following:

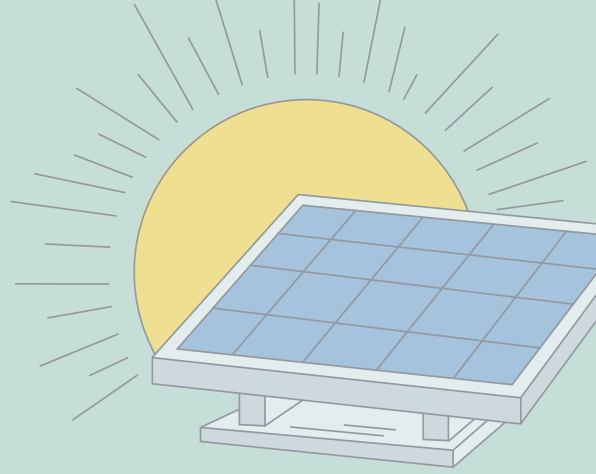

- Thermal insulated glazing has been installed throughout the hotel to improve energy efficiency.
- All guest rooms are equipped with a switch system integrated with the balcony doors. When a balcony door is opened, the air conditioning system is automatically deactivated to prevent unnecessary energy consumption.
- A key-card energy management system is installed in all guest rooms. When guests leave the room and remove their key card, the electrical system is automatically switched off, except for the minibar.
- Energy-efficient lighting, including LED lamps, is used throughout the property.
- High-efficiency, low-energy-consuming equipment and machinery are used wherever possible. When purchasing new equipment, energy-efficient models are given priority.
- Guest room minibars and televisions are positioned inside cabinets and away from direct sunlight to improve operating efficiency.
- When guest rooms are unoccupied, blackout curtains and sunshades are kept closed to reduce solar heat gain and decrease cooling demand.
- Renewable energy is utilized through the use of solar energy systems.
- Electric models are preferred when purchasing new buggy vehicles for hotel operations.
- Regular maintenance and cleaning of electrical equipment are carried out to minimize energy losses and ensure efficient operation.
- Electricity, LNG, LPG, and water consumption are monitored and recorded on a daily basis. In the event of abnormal consumption, the Technical Services Department investigates the cause and implements the necessary corrective actions.
- An electric vehicle (EV) charging station is available for guests using electric vehicles, encouraging the adoption of sustainable transportation.

For the comparison of energy consumption, the analysis is based on the consumption data for the January–June period of 2025 and 2026, as the available data covers only these months.

ENERGY SOURCE	2025	2026
Electricity Consumption (KWH)	640865,0	621728,0
Consumption Diesel (Lt)	2450,0	5290,0
LPG Consumption (Kg)	3876,8	5043,0
LNG Consumption (Kg)	22068,2	23913,0

ENERGY CONSUMPTION PER GUEST NIGHT BY ENERGY SOURCE	2025	2026
Electrical Energy Consumption Per Guest/night (Kwh/nights)	18,60	17,71
Diesel Consumption Per Guest/night (Kg/nights)	0,07	0,15
LPG Consumption Per Guest/night (Kg/nights)	0,11	0,14
LNG Consumption Per Guest/night (Kg/nights)	0,64	0,68

Our Energy Consumption Goals

It is aimed to reduce energy consumption per guest in 2027.

We will continue to raise awareness of our guests and staff about energy efficiency. We will regularly provide training to our staff on energy efficiency.

We will continue to use energy efficient devices and machines that consume less energy.

We will continue to use renewable energy sources in our hotel. We will continue research to benefit more from renewable energy sources.

Water Management

At Marmaris Bay Resort Hotel, we have established objectives to reduce the consumption of natural resources. Water consumption is monitored regularly, and immediate action is taken whenever any issue or abnormal usage is identified.

The water conservation practices implemented at our hotel are listed below:

- Environmental awareness cards are available in guest rooms. Guests are kindly requested to place towels on the floor if they would like them to be replaced, or hang them up if they wish to reuse them. This practice prevents unnecessary washing of clean towels and helps reduce water and chemical consumption.
- Special water-saving aerators with air-mixing technology are installed in all guest rooms, public restrooms, and staff accommodation areas. The water flow rate from shower heads in guest rooms does not exceed 15 liters per minute, while the flow rate from faucets does not exceed 6 liters per minute.
- Dual-flush toilet systems are used in guest rooms and public areas to enable different water flow volumes according to usage requirements.
- Thermal insulation has been applied to the hotel's piping systems to prevent heat loss and improve energy efficiency.
- The hotel does not have bathtubs; instead, shower trays are provided in guest rooms to reduce water consumption.
- Garden irrigation is carried out during morning or evening hours to minimize water loss caused by evaporation.
- Employees receive training on water conservation practices and the importance of reporting water leaks immediately.
- Informative signs promoting water-saving practices are placed in guest room bathrooms and public restroom areas to raise awareness among guests.
- The hotel operates a biological wastewater treatment plant. Wastewater generated from operations is treated through various stages and subsequently reused for garden irrigation purposes.

For the comparison of water consumption, the analysis is based on the consumption data for the January–June period of 2025 and 2026, as the available data covers only these months.

WATER CONSUMPTION	2025	2026
Water Consumption (m ³)	18760	18033

WATER CONSUMPTION PER GUEST NIGHT BY ENERGY SOURCE	2025	2026
Water Consumption Per Guest /night (m ³ water/nights)	0,54	0,51

Our Water Consumption Goals

It is aimed to reduce water consumption per guest in 2027.

We will continue to raise awareness of our guests and staff about water saving.

Waste Management

Zero Waste System; It has goals such as preventing waste, using resources more efficiently, reducing the amount of waste generated, collecting waste separately at the source, recycling waste, and tracking disposed waste.

The amount of waste produced in our hotel is monitored, researches are carried out to reduce the amount of waste, and the waste is disposed of by licensed companies according to its type.

The activities we carry out regarding waste management in our hotel are listed below.

There are informational notices about waste management on the boards in our hotel for our guests and staff.

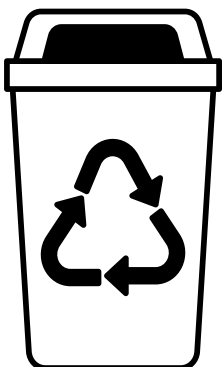

There are organic and inorganic waste buckets to separate the waste from our guests' rooms.

Our hotel has different waste bins in certain areas for separate collection of waste.

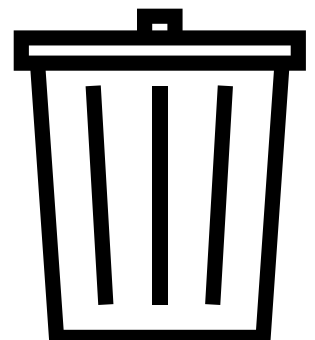

Hazardous waste collected in our hotel is kept in the hazardous waste room. Accumulated hazardous wastes are sent by a licensed carrier company under appropriate conditions.

Waste vegetable oils are collected in drums separately from other wastes. It is then taken by the contracted licensed carrier company and recycled as biodiesel.

Waste batteries are collected in red recycling bins separately from other waste. It is then delivered to the TAB Association by cargo.

We provide training to our staff on environmental issues (such as environmental pollution, waste management, waste codes, separate collection at source, environmental legislation, water and energy saving) by our environmental engineer. In addition, training on waste management is also given by department managers.

Chemical Usage

At our hotel, various chemicals are used in different departments, including the kitchen, service, housekeeping, and technical services, for operational purposes. We recognize the importance of using chemicals responsibly in order to minimize potential environmental impacts.

Therefore, our employees receive continuous training on the correct and appropriate use of chemicals, ensuring that they are used in the right quantities and in accordance with operational requirements. This approach helps reduce unnecessary chemical consumption, prevent environmental risks, and promote sustainable operational practices.

MSDS (Material Safety Data Sheet) documents for all chemicals used in our operations are maintained and kept available by our hotel.

Employees who use chemical substances receive training from qualified professionals on the proper handling and use of chemicals. Practical drills are conducted to ensure that employees know how to respond appropriately in the event of a spill or leakage of hazardous chemicals. In addition, personal protective equipment (PPE) is provided to employees working with chemicals, and training is provided on the correct use of this equipment to ensure safe working practices.

Pest control services at our hotel are provided by an external professional company. The necessary documentation confirming that the pesticides used by the pest control provider do not pose a risk to human health or the environment is maintained and available at our hotel.

Carbon Emission

We are aware of the damage global warming causes to our world. For this reason, the ways we have followed and will continue to follow to reduce carbon emissions are listed below.

- We will continue to reduce energy consumption by using high-efficiency machinery and equipment.
- When purchasing new equipment and devices, we will give preference to environmentally friendly technologies that are compatible with renewable energy sources or operate on electricity.
- We will continue to provide our guests and employees with information and training on recycling, while improving the effectiveness of our recycling practices.
- We will prioritize working with suppliers located as close to our hotel as possible. This will help reduce CO₂ emissions generated from transportation and delivery vehicles.
- By supporting tree-planting initiatives, we will contribute to offsetting a portion of the CO₂ emissions we generate through increased oxygen production and carbon sequestration.
- We aim to reduce our carbon footprint by 2% as part of our sustainability objectives.

Social Studies We Participated In

As Marmaris Bay Resort Hotel, we donate textile products that are no longer required for our operations but remain in usable condition to various animal shelters. Through these donations, we aim to support the care and well-being of shelter animals while contributing to the reuse of textile materials and the reduction of textile waste.

To raise awareness about the protection of the marine ecosystem, we have established a Marine Pollution Awareness Museum, where we exhibit waste washed ashore from the sea as well as litter collected by our guests. Through this initiative, we aim to draw attention to the environmental impacts of marine pollution, increase environmental awareness among our guests, and encourage more sustainable lifestyles.

In order to contribute to the protection of our country's natural, historical, and cultural heritage, a donation has been made to the Foundation for the Protection and Promotion of the Environment and Cultural Heritage (ÇEKÜL). The donation will support projects aimed at preserving cultural heritage and passing it on to future generations.

Social Studies We Participated In

To support cooperation with public institutions and contribute to the effective delivery of public services, Marmaris Bay Resort Hotel provided technical equipment and vehicle support to the Marmaris National Real Estate Directorate.

To contribute to environmental protection and support efforts to combat forest fires, Marmaris Bay Resort Hotel provided the necessary support to the Marmaris District Gendarmerie Command for use in firefighting operations. Through this initiative, we contributed to environmentally responsible efforts aimed at protecting natural ecosystems.

To contribute to environmental protection, support the cleanliness of natural habitats, and raise environmental awareness, regular environmental clean-up activities were carried out in and around the hotel premises and surrounding outdoor areas.

Cultural Studies

Ottoman A la Carte Restaurant

In our Ottoman à la carte restaurant, appetizers, salads, hot appetizers, main courses and desserts from Turkish culture are served to our guests free of charge.

Turkish Bath

Turkish bath, which has a great importance in Turkish culture, is also available in our hotel. Turkish bath experience is offered free of charge to our guests.

Turkish Night

Turkish Night is held every week to promote Turkish food and traditions. At the Turkish night, local Turkish dishes and desserts are served, and the Turkish folklore dance team performs for the guests.

Archery

Our hotel offers a dedicated area where guests can experience traditional Turkish archery, helping to promote and preserve this cultural heritage.

Access For All

At Marmaris Bay Resort Hotel, we recognize that anyone can experience a disability at any stage of life, and we embrace the principle of "Accessibility for All." We are committed to ensuring that guests with disabilities and special needs can enjoy our facilities safely, comfortably, and independently. Necessary accessibility arrangements have been implemented throughout our property, and we are dedicated to continuously improving our accessibility services.

As part of this commitment:

- Accessible ramps are provided at appropriate locations, from the hotel entrance throughout the common areas, to facilitate easy access across the property.
- Our hotel offers two accessible guest rooms specifically designed to meet the needs of guests with disabilities and special requirements.
- To enhance accessibility, we provide one pool lift for convenient access to the swimming pool and two beach wheelchairs to support access to the beach.
- Our employees are trained in accessibility awareness and are always ready to assist guests with disabilities and special needs whenever required.

The accessibility measures implemented at our hotel are regularly reviewed and continuously improved to ensure that all guests can enjoy our services on equal terms.

Marmaris Bay Resort Hotel conducts all activities related to land use and water use in full compliance with applicable national legislation, legal permits, and relevant regulations. The hotel's land use, water supply, and management of water resources meet all applicable legal requirements and are carried out in accordance with the conditions established by the competent authorities.

Contact Us

The opinions and feedback of the local community regarding our hotel are extremely important to us. We do not wish for any member of the community to experience any inconvenience or negative impact arising from our operations. Therefore, in case of any complaints or concerns related to our hotel, local residents are welcome to contact us through the communication channels provided on our website.

Aşkın Sül and Cemal Kaş, who have been appointed as Local Community Communication Representatives, will take the necessary actions to address and resolve any issues in a timely and effective manner.
